JUST JEANNETTE

We have asked Jeannette Copeland to write a special column for this publication. It will consist of answers to those of you who have problems. And in this day and age, who doesn't have a bothersome situation? We have selected Jeannette Copeland because of her wide experience and knowledge of today's youth. She can talk your language and understand what you have to contend with as you face the tough realities of life that require sound thinking and control of the emotions. So, if you have something on your mind, write her a letter. State your situation simply. There will be no personal replies. But from your letters will be chosen one to be answered in the column of every issue of this publication. Please write legibly.

Dear Jeannette Copeland:

I have a problem which bothers me quite a bit. It is about this boy I am dating. He is in the Army. He is going steady with a girl from his home-town. And plans to marry her in the near future. The thing that bothers me is that he keeps on wanting to see me. I even tell him that he doesn't love this girl, to go with me. He wears her class ring and this makes me feel pretty low. Everyone tells me that he is just playing me for a sucker. He tells me that his steady girl knows all about me. We quit seeing each other for two weeks. While I was trying to forget him. But I just couldn't. I even went out with other boys. But he was always on my mind.

Then later I went to a party and he was there. I was talking to another boy and he just comes right up to us and starts talking to me. So I just ignored him. I left the party and everywhere I went he followed me trying to get me to go with him. But I didn't. However the next night we did go out together. And now we are together again. I am so mixed-up. Do you really think he cares for me? Please I need help before I go out of my mind.

Signed,
A B S

Dear A B S.

I can well understand why you are bothered by this situation. But given the same set-up you can also understand that other girls and boys find themselves with the same bothersome problem. A boy leaves his girl behind. And enters the armed services of our country. He is now away from home. He wants to go out to parties, dances, affairs, and be with other people. But his girl is not around. He is lonesome for feminine companionship.

So he meets another girl. They go out together. And as he might say it, "They hit it off rather well." In fact he may even find he likes her very much. And liking her can even turn into love. And this is what you would like to happen. But what are the real facts you must face?

First of all he has been honest with you. He hasn't concealed the fact that he has a girl back home and plans to marry her. He could have concealed this and given you a real heartbreak.

He wants your companionship during the period he is in your area.

Second, there is of course a danger in all of this. Namely, that you might begin to fall in love with him. And to me it seems that this is what is happening. Do you love him or do you inwardly feel you want to take him away from his other girl? Like sort of a challenge.

Third, the reverse is also true. He may fall in love with you. Please try to do some thinking with me. Suppose the next week he is transfered to another part of the country? Are you two going to get married? Will you go with him? Or remain back home? Or if he leaves for his home-town tomorrow, what then? Let us say he marries you and brings you back home with him? Are you intelligent to see some possible tragic situations ahead?

Yet nowhere at all in the letter have you told me he wants to marry you. He will go home and marry that other girl. It may hurt your heart and pride, but the best thing is to forget him.

Cordially yours,
Just Jeannette

Girls! Now Have A Fabulous Figure The 6 Second Way!

It is almost like a miracle. You can actually lose flab around stomach, thighs, waist, hips, neck, face and not move out of your seat. Unbelievable. New scientific tests show that you get faster and better results from Isometrics, the new method of exercise. Another astounding fact is that you do each exercise only 6 seconds a day. No special equipment is required, and you can concentrate on any part of the body that you are interested in controlling.

ONLY $1.70

How-To-Photographs

Every page is fully illustrated with photographs showing exactly how to perform the Isometrics and how to get the best and fastest results.

A Must For Dieters

You will still need Isometrics even if you have decided to reduce solely by dieting. Because when the fat is gone there will remain layers and layers of loose, flabby, unattractive skin that had been stretched out by the fat. Miracle Isometrics tightens and restores the firmness to the skin and eliminates the undesired flabbiness. Isometrics does it in only 6 seconds a day. Convince yourself. Mail the coupon.

Designed By Experts

The exercises were prepared under the supervision of Victor F. Obeck, Professor of Physical Education, New York University and Isadore Rossman, M.D., Medical Director, Department of Home Care and Extended Services, Montefiore Hospital, New York.

HEAVY LEGS

Try this new, amazing, scientific home method to REDUCE HIPS, THIGHS KNEES, CALVES, ANKLES for SLENDERIZED LEGS

TESTED AND PROVEN METHOD—ONLY 15 PLEASANT MINUTES A DAY!

This most encouraging news for women with fat, flabby legs was revealed by Henry Milchstein, M.S., Ph.T. If your legs are heavy due to normal causes, you should try to attain the slender, alluring legs you've always wanted. This well-known physiotherapist was President of the Metropolitan School of Physiotherapy. His record is enviable in helping lovely stage and screen actresses as well as women like yourself to mold beautiful legs. Over a period of over 30 years, he used an amazingly natural method which is unsurpassed by anything we have ever seen. Thousands gladly paid high fees for his personal instruction here in New York City. Now it is possible for any woman to try this famous expert's method, requiring only 15 minutes a day, right in the comfort and privacy of her own home at a tiny fraction of this cost.

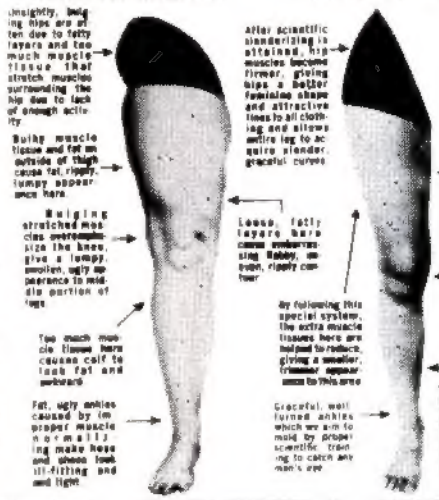
How Your Individual Heavy Leg Problems Can Be Corrected By this Method

Ordinary Methods Found to Help Little in Slenderizing Heavy Legs

Many women engaged in improper strenuous exercises and calisthenics used up a lot of time and energy but it did next to nothing for concentrating on trimming down heavy legs. Other women actually tried reducing diets alone to slenderize heavy legs. Since a weight reducing diet cannot be made to take weight off any single part of your body, you may lose weight everywhere but in your legs. And if your legs lost a little weight, no drug or diet can normalize and firm the entire contour, which would remain flabby. This method does concentrate on slenderizing each section of your legs from the hips to the ankles.

A Technique Based on Years Of Professional Experience

This progressive scientific method for slenderizing heavy legs is based on the knowledge and experience of professionals including physiotherapists and famous body contour experts throughout the world. HEALTH CULTURE Magazine asked this authority on legs to write a series of articles on the fundamentals of this method so that their readers learn about this wonderful technique.



HEAVY LEG Sections That Need To Be Slenderized
NORMAL LEG Sections We Aim To Achieve
Unsightly, bulging hips are often due to fatty layers and too much muscle tissue that stretch muscles surrounding the hip due to lack of enough activity.
Bulky muscle tissue and fat on outside of thigh cause fat, ripply, lumpy appearance here.
Bulging stretched muscles overemphasize the knee, give a lumpy, swollen, ugly appearance to middle portion of legs.
Too much muscle tissue here causes calf to look fat and awkward.
Fat, ugly ankles caused by improper circulation make hose and shoes look ill-fitting and tight.
After scientific slenderizing is attained, hip muscles become firmer, giving hips a better feminine shape and attractive lines to all clothing and allows entire leg to acquire slender, graceful curves.
This scientific technique tends to normalize muscles and break down fat to give this area slimmer, more normal, more alluring look.
Loose, fatty layers here cause unsightly, sagging, flabby, uneven, ripply contour.
Normalized muscles around knee combine slender, attractive line of leg from thigh to ankle.
By following this special system, the extra muscle tissues here are helped to reduce, giving a smaller, trimmer appearance to this area.
These specialized methods tend to reduce these excessive muscle tissues into the slender, truly feminine calf contours you want so badly.
Graceful, well formed ankles which we aim to mold by proper scientific training to catch any man's eye.

Stronger Slender Legs Help You Dance, Swim, Play Sports, Walk, Stand, Improve Your Appearance in Clothes!

SKINNY LEGS

Try this new, amazing, scientific home method to Add SHAPELY CURVES at ANKLES, CALVES, KNEES, THIGHS, HIPS!

TESTED AND PROVEN METHOD – ONLY 15 PLEASANT MINUTES A DAY!

This most encouraging news for women with thin, underdeveloped legs was revealed by Henry Milchstein, M.S., Ph.T. If your thin legs are due to normal causes, you should try to attain the strong alluring shapely legs you've always wanted. This well-known physiotherapist was President of the Metropolitan School of Physiotherapy. His record is enviable in helping lovely stage and screen actresses as well as women like yourself to mold beautiful legs. Over a period of 32 years, he used an amazingly natural method which is unsurpassed by anything we have ever seen.

Thousands gladly paid high fees for his personal instruction here in New York City. Now it is possible for any woman to try this famous expert's method, requiring only 15 minutes a day, right in the comfort and privacy of her own home at a tiny fraction of this cost.

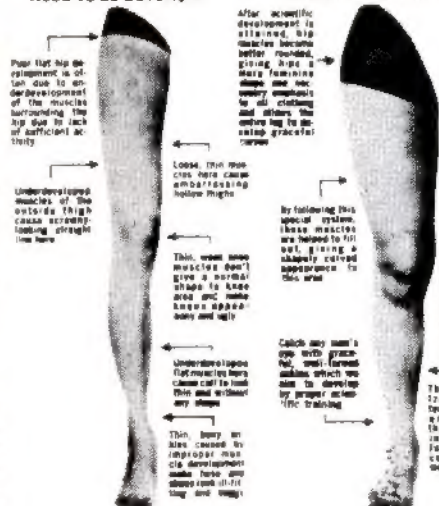
HOW YOUR INDIVIDUAL THIN LEG PROBLEMS CAN BE CORRECTED BY THIS METHOD

Ordinary Methods Found to Help Little in Developing Skinny Legs

Many women engaged in improper strenuous exercises and sports to develop their legs. As a result they may build up some leg muscles at the expense of the rest of the leg causing their legs to look out of proportion. Other women tried drugs or diets alone to fill out thin legs. Since a weight gaining diet cannot be made to add weight to any single part of your body, you may gain weight everywhere but in your legs. And if a little weight was added to your legs, no diet could strengthen and develop all the leg muscles to their normal shape and your legs would be left with flabby fat that would do little to give your legs shapely curves. This method does concentrate on adding shapely curves to each section of your legs from the hips to the ankles in normal proportions.

A Technique Based on Years Of Professional Experience

This progressive scientific method for developing thin legs is based on the knowledge and experience of professionals including physiotherapists and famous body contour experts throughout the world. HEALTH CULTURE Magazine asked this authority on legs to write a series of articles on the fundamentals of this method so that their readers learn about this wonderful technique.



THIN LEG Sections That Need To Be Developed
NORMAL LEG Sections We Aim To Achieve
Poor flat hip development is often due to underdevelopment of the muscles surrounding the hip due to lack of sufficient activity.
Underdeveloped muscles of the outside thigh cause unsightly, straight line here.
Loose, thin muscles here cause embarrassing hollow thighs.
This, when bone muscles don't give a normal shape to knee area and make knees appear bony and ugly.
Underdeveloped flat muscles here cause calf to look thin and without any shape.
Thin, bony ankles caused by improper muscle development make hose and shoes look ill-fitting and tight.
After scientific development is attained, hip muscles become better rounded, giving hips a more feminine shape and necessary emphasis to all clothing and allows the entire leg to acquire graceful curves.
By following this special system, these muscles are helped to fill out, giving a shapely curved appearance to this area.
Calves are normalized to give a more natural, alluring fullness.
Normal, developed muscles around knee continue smooth attractive shape from thigh to ankle.
Calves any man's eye with graceful, well-formed ankles which we aim to develop by proper scientific training.
This scientific technique tends to strengthen and fill out muscles to give this area a more normal, alluring fullness.
These specialized methods tend to strengthen and mold these muscles into the truly feminine calf contours you want so badly.
